- **commit date** - in "yyyy-MM-dd HH:mm:ss Z" format (see javadoc for details).
- **revision** - format depends on underlying VCS.
- **author** - committer name from VCS.
- **file name before change** - empty if file was added or name didn't change.
- **file name after change** - empty if file was deleted.
- **path to file before change** - empty if file was added, path didn't change or file is in root folder.
- **path to file after change** - empty if files was deleted or is in root folder.
- **change type** - can be "NEW", "MODIFICATION", "MOVED" or "DELETED". Renaming or moving file is "MOVED" even if file content has changed.
- **number of lines in file before change** - "-1" if file is binary or "Grab change size" checkbox is not selected in "Grab Project History" dialog; "-2" if file is too big for IntelliJ to diff.
- **number of lines in file after change** - similar to above.
- **number of lines added** - similar to above.
- **number of lines modified** - similar to above.
- **number of lines removed** - similar to above.
- **number of chars in file before change** - similar to above.
- **number of chars in file after change** - similar to above.
- **number of chars added** - similar to above.
- **number of chars modified** - similar to above.
- **number of chars removed** - similar to above.
- **commit message** - new line breaks are replaced with "\n".
